

Use-Case Flow Specification

Use Case: UC-02 – Reserve Pickup Window

1. Preconditions:

1. The shelter coordinator is a verified shelter user.
2. At least one suitable food batch is available for reservation.
3. The selected food batch has not expired.

2. Postconditions

1. The selected food batch is reserved for the shelter.
2. The selected pickup window is recorded.
3. A reservation confirmation is displayed to the shelter coordinator.

3. Main Success Scenario

1. Shelter Coordinator views the available surplus food batches.
2. System displays available food batches with their expiry information.
3. Shelter Coordinator selects a suitable food batch.
4. System displays the available pickup windows for the selected batch.
5. Shelter Coordinator selects a pickup window before the food expires.
6. System records the reservation.
7. System generates a pickup verification code.
8. System displays the reservation confirmation and pickup verification code.
9. Use case ends successfully.

4. Alternate Flow

A1. Selected Food Batch Has Expired

1. At Step 3, the system detects that the selected food batch has expired.
2. System informs the Shelter Coordinator that the food batch is no longer available.
3. System removes the expired batch from the available listings.
4. Shelter Coordinator selects another available food batch.
5. The use case continues from Step 3 of the Main Success Scenario
